

Notes for using LaTeX template

Please check that you use the option conference from the general template:

```
\documentclass[conference]{IEEEtran}
```

Please check that the empty line at the end of the abstract text is present.
You can add the empty line at the end of the abstract text using

```
\\  
or  
\vspace{10pt}
```

command before `\end{abstract}` command.

Please use “Keywords” instead of “Index Terms”, for this, you can add the command

```
\def\IEEEkeywordsname{Keywords}  
or  
\renewcommand\IEEEkeywordsname{Keywords}
```

before IEEEkeywords block (`\begin{IEEEkeywords} ... \end{IEEEkeywords}`).

Please pay attention, your affiliation and keywords of the paper should be italicized.

Please check your References for correspondence to the IEEE Conference citation format.

Advice:

To separate Author block on different lines, if needed, before the Authors block (`\authors{}`) add the code

```
\makeatletter  
\newcommand{\linebreakand}{  
  \end{@IEEEauthorhalign}  
  \hfill\mbox{}\par  
  \mbox{} \hfill\begin{@IEEEauthorhalign}  
}  
\makeatother
```

and then in Authors block, using command

```
\linebreakand
```

instead of

```
\and
```

you can add a new line for the Authors’ columns inside of the Authors block.
